Personal Statement I am a highly skilled software engineer with a diverse background in the tech industry, boasting a broad range of technical proficiencies across multiple programming languages and platforms. With over a decade of experience, I have led complex projects from conception to launch in the high-end corporate sector. My expertise extends to UI architecture, cybersecurity, and cloud computing, allowing me to deliver comprehensive solutions that meet enterprise-level demands. Additionally, as an entrepreneur, I have started two businesses, leveraging my technical and leadership skills to turn unique ideas into successful enterprises.

Professional Experience

Frontier Applications *Mobile Software Engineer*
January 2024 - Present

- Founded and lead the mobile software engineering efforts, specialising in creating MVPs for iOS apps using Swift.

- Managed the full development cycle from concept to final testing, focusing on user feedback and iterative improvements to prepare our business for scalable success.

Lucid Partnership LLP *Software Engineer*
April 2016 - Present

- Engaged in the design and implementation of bespoke software solutions in the AV industry across a global corporate client base.

- Led a QA team, implementing testing protocols that ensured product quality and compliance with rigorous standards.

Education

London South Bank University *BEng Degree in Computer Systems and Networks*
April 2015

- Graduated with First Class Honors, actively engaging in a curriculum that spanned across various tech subjects, particularly software engineering.

Certifications

Microsoft Certified Professional *Programming in C#*
January 2021

- Demonstrated proficiency in managing program flow, creating types, debugging applications, and implementing data access.

Crestron Masters Certified Programmer *CTI-CCP*
August 2017

- Mastered the design and maintenance of advanced control systems using Crestron's tools, enhancing abilities in user interface creation and system automation.

Skills
